

Data Journalism

Presentation of projects

Projects

1. Armi Acciaio e Malattie
2. Evoluzione del prodotto cinema
3. Vendita dei libri in Italia
4. Il tasso di occupazione in Italia
5. Il diritto di manifestare
6. Spreco alimentare

Presentation of the working group

The idea of the project

Data journalism begins in one of two ways:

1. *a question that needs data, (journalistic)*
2. *an interesting dataset that needs questioning (data scientist)*

List of questions

Define which questions the story should answer

- general questions
- specific questions

Each question should be **short** and **clear**.
The number of questions should be **limited**.
New questions could arise during the investigation.
The final list will be the chapter of our story

Data collection

The data we plan to use

- source
- number of data
- data content

List of interviews

- People we plan to interview
- How do we plan to use these interviews
 - Understand the domain of knowledge
 - Discover interesting stories to tell
 - Verify the final job
 - Include the interviews inside the story
